

# ECO ADVENTURE FUN FACTS BUTTERFLIES

We have gathered some strange butterfly facts to share with you. Amaze your friends! Enjoy!

- There are over 400 species of butterflies in Cambodia
- Butterflies can see red, green, and yellow color.
- There are about 24,000 species of butterflies. The moths are even more numerous: about 140,000 species of them all over the world.
- Some moths never eat anything as adults because they don't have mouths. They must live on the energy they stored as caterpillars.
- People who eat insects are called "Entomophily" (people eating-bugs) – it has been practiced for centuries throughout Africa, Australia, Asia, the Middle East, and North, Central and South America. Why? Because many bugs are both protein-rich and good sources of vitamins, minerals and fats.

## Atlas Moth

- One of the world's largest butterflies is the Atlas with a wingspan of 26cm or around 11 inches and lives in Cambodia.
